

Twin Towers

INTRODUCTION

Striking design of Zaward's Twin towers north bridge cooler, unlike other conventional ones, Twin towers takes you to an upper level of cooling world. Apply with high efficient patent heatpipe technology; Clever design of the rotary heatsink is easy to adjust in accordance to the motherboards and avoid interference with other components; Universal clips are compatible with all motherboards.

FEATURES

- Innovative soldering free process, environmental-friendly.
- Duo high conductive heatpipes operating with high density heat-dissipating area to boost s cooling performance!
- Patent twin towers rotary heatsinks to adjust direction according to the motherboard.
- High-tower design avoids interference to graphic cards.
- Universal clips design, compatible with all mainstream motherboards and easy to install.
- Zero dBA and Value-saving! No need to purchase extra fan, rapid heat dissipating only by natural convection in chasis!

SPECIFICATION

Application	All motherboard
Product Dimensions	LxWxH=65.8x35.0x120.0+/-1mm
Material	Pur Copper base Aluminum fins
Heatpipe	Pur Copper 8mm x 1 pcs Pur Copper 5mm x 1 pcs
Weight (NET)	120+/-10g
Noise Level	0 dBA

Easy Installation.
